# System Sequence Diagrams

Purpose:

We illustrate how we expect volunteers to use the CIT mobile app so that we can receive client feedback on whether using the app will pose a challenge to volunteers.

The systems `CIT Server` and `CIT Database` were initially included in the SSD, but later omitted since they are part of the backend and therefore unlikely to be of interest to the client.

A volunteer using the CIT mobile app for the first time

Purpose:

The client does not want organizations to experience significant administrative burden when registering volunteers with the CIT.

We illustrate how we expect organization admin to register volunteers on the CIT mobile app to demonstrate to the client that this process will not pose significant administrative burden.

How an organization will register its' volunteers onto the CIT
